

**We can all need
a protection!**

Pump house

Caravan/Boat

Green house

Electric freeze protection

When the weather gets colder you never know what can freeze. To be sure that nothing will happen, place this small heater for example in the storeroom, food cellar, or why not in the greenhouse, garage and before all at water pipes and by the pump house.

This small guard can be used both in the boat and in the caravan.

It can also be used as a radiator/heater or moisture killer in summer as well as in winter

Technical information:

Allowed to be used in dry and wet spaces.

Thermostat:

The function area of the thermostat is +5°C to + 35°C.

Freeze protection:

Automatic freeze protection from +5°C.

The plug shall be connected to an earth socket. The indication lamp shows connected power.

Approval:

S CE IP 21

2 years guarantee
